In order to maintain these ideals we expect our associates as well as our business partners to always act in the best interest of open competition, not to practise any kind of distortion of competition or to offer or accept any kind of direct or indirect, private or commercial inadequate advantage.

We support the 10 principles of the Global-Compact-Initiative, we expect our business partners to do so as well and reserve the right to only to make business with companies that

- act after the universally valid human rights,
- do not profit from psychological or physical enforced or in terms of national law respectively customary in the particular trade inadequately rewarded work or labour time,
- abandon corruption and discrimination of every description,
- and grant their workers the freedom of association and collective bargaining.

The physical and psychological health of all associates has to be maintained at all times by providing a safe and hygienic work environment.

Quality is our common goal – the same standards of quality apply to all countries we work in. Our reputation is affected by the behaviour and performance of our associates and is the responsibility of each one of us.
